Plug Company Registry, Financials & Ownership data into your own AI workflow'

The Handshakes MCP Connector links your AI assistant to trusted company and relationship data, so you can research entities, ownership and risk without leaving the chat.

WHY CONNECT HANDSHAKES TO YOUR AI ASSISTANT

Stay focused on reasoning

Use plain language to ask for the data you need from Handshakes.

Fast access to data

No new tech builds. A few clicks to company, ownership and risk data.

Seamless data integration

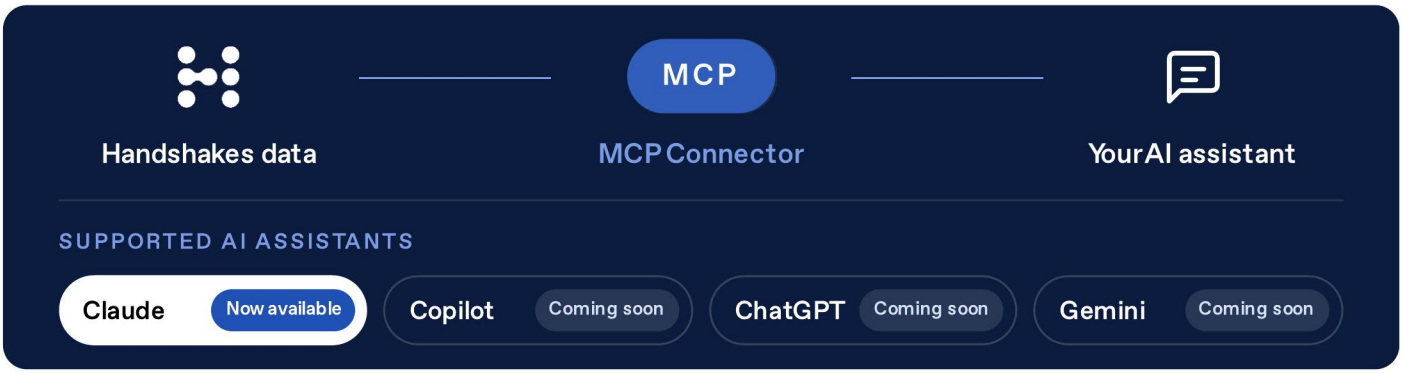

Combine Handshakes data with your existing sources.

CAPABILITIES

CAPABILITIES	WHAT YOU CAN ASK
Find an entity Locate the right entity using key identifiers.	“Find information on Company A.”
Explore entity details Review key information at a glance.	“What is the current status of Company A?”
Map relationships Uncover connections across people and entities.	“Who are the directors and shareholders?”
Trace ownership Follow shareholdings through layers to the ultimate owner.	“Who ultimately owns this company?”
Screen for RED-List Flag potential risk among linked parties.	“Any RED-List exposure for this company?”

HOW IT WORKS

An integration layer between Handshakes and your AI assistant

SET UP ONCE, IN MINUTES

1 Open settings
In your AI assistant, go to Settings.

2 Find Handshakes
Search for Handshakes in Connectors.

3 Authorise
Sign in with your Handshakes account.

4 Start asking
Ask about any company in plain language.

THE DIFFERENCE

Web search vs Handshakes data

The same counterparty onboarding question, asked of Claude twice: once with web search alone, once with the Handshakes MCP Connector.

14 / 22
data points came back only with the connector.

CATEGORY	WEB SEARCH	WITH HANDSHAKES	MISSING FROM WEB SEARCH
Entity identity	2 / 6	6 / 6	Identifier variants, entity status, record date REGISTRATION NUMBER UNVERIFIED
Ownership	1 / 6	6 / 6	Named holders, share counts, exact percentages, ownership chain
Directors and officers	1 / 4	4 / 4	Statutory source, appointment dates, current vs former
Adverse exposure	2 / 4	4 / 4	Machine-readable risk disposition CASE DETAIL PARTIAL
Provenance	0 / 2	2 / 2	Citable record identifier, dated source

Both answers were generated on 25 Sep 2026 using the same question. The comparison answer had web search available, while access to the Handshakes Connector was withheld. Registry record current to 9 May 2026, Malaysia Company Registry (SSM).
